Subject: Application for Backend Developer (Internship)

Dear Hiring Team,

I am writing to express my eager interest in the Intern - Backend Developer position at Spaceship. As a highly motivated student currently pursuing a B.Sc. in Computer Science and Engineering from American International University-Bangladesh, I am seeking an opportunity to apply my strong foundation in server-side programming and database management to build scalable backend systems.

I have researched Spaceship's mission to transform real estate and logistics through technology, and I am enthusiastic about the opportunity to contribute to your customer-facing apps and internal modules. My academic background and technical skills align well with the requirements for this internship:

1. **Backend Development:** I possess a strong understanding of PHP and MySQL, which are essential for developing robust server-side applications.

2. **Database & Logic:** My personal project, an Online Shopping Management System, utilized SQL for database operations, honing my ability to manage data and write efficient queries.

3. **Problem Solving:** I bring strong analytical and problem-solving abilities, essential for debugging and maintaining project quality.

4. **Adaptability:** While I have a diverse programming background in C, C++, and Java, I am eager to deepen my experience with the Laravel framework and API development within Spaceship's professional environment.

I am committed to writing clean, maintainable code and working closely with senior developers to deliver high-quality solutions. The prospect of working with a Singapore-based venture capital-funded startup is highly motivating.

Thank you for reviewing my application. I have attached my resume for your detailed review and look forward to the opportunity to discuss my qualifications further.

Sincerely,

Farhan Shadik Souad
